

**MEGAWATT  
SOLUTIONS**

## **Sonority Sustainable Energy AB changes name to MegaWatt Solutions Nordic AB**

Global energy markets are often associated with volatility, innovation, disruption, or any number of other rousing traits before a more staid characteristic such as reliability. The COVID-19 pandemic has accentuated the need for a new approach to energy: Abundant, clean, affordable and accessible to all. For BrainHeart Energy Group, the COVID-19 crisis has reinforced our critical role in helping the energy sector function through agility, ensuring resilient, reliable, and uninterrupted access to energy.

To affirm the power of organizational purpose, to fulfill the promise and to prevent perils of a rapid shift to remote working, BrainHeart Energy AB re-centered the business focus of Sonority Sustainable Energy AB, changed its name to: **MegaWatt Solutions Nordic AB**. [www.megawattsolutions.se](http://www.megawattsolutions.se)

The new company MegaWatt Solutions Nordic AB will emphasize on how the organization of the future continued to operate in a resilient manner, focus on customer experience, and continue to be the leading player in sustainability and digital transformation of the energy industry.

BrainHeart Energy AB has newly appointed **Cynthia Jonströmer** to be the CEO of MegaWatt Solutions Nordic AB, replacing Mr. Bengt Wallentin.

Cynthia Jonströmer recently reflected on her “CEO moment” and discussed: “If anything has to be made equal first in our society, it’s our access to abundant and inexpensive clean energy. It is our opportunity and our responsibility to lead healthy lives on this planet.”

Welcome to a joint journey to achieve energy democracy:  
Limitless, clean energy for all.
